

DIGVIJAY WADEKAR

Frontend Developer

☎ +91-9834826609 ✉ digvijaywadekar350@gmail.com 🌐 github.com/Digvijaywadekar2004

Summary

Frontend-focused developer with hands-on experience building real-time, interactive web applications using React, JavaScript (ES6+), and modern UI tooling. Comfortable working across the stack when needed — from live data pipelines to polished dashboard interfaces. Seeking a Frontend / Web Developer role.

Skills

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Vite, Recharts, Responsive Design

Backend & Database: Node.js, Express.js, Socket.io, REST APIs, MongoDB, PostgreSQL

Tools: Git, GitHub, VS Code, Postman

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems

Projects

TrackPulse – Real-Time Vehicle Telemetry & Engine Diagnostics Dashboard | *React, Node.js, Socket.io, MongoDB*

- Built a low-latency telemetry streaming pipeline using Socket.io to ingest and render live vehicle metrics (RPM, speed, DPF soot levels, fuel trim) with real-time dashboard updates.
- Engineered a diagnostics engine that detects vacuum leaks via short-term fuel trim anomalies at low idle RPM, and models DPF soot buildup with passive regeneration behavior at high RPM.
- Implemented real-time collision detection using G-force signature analysis, triggering instant in-app emergency alerts.
- Designed a virtual car simulator generating multi-condition synthetic OBD-II data to drive the live pipeline end-to-end, and built an interactive React dashboard with live-updating charts (Recharts).

Password Strength Indicator | *HTML5, CSS3, JavaScript*

- Built a real-time password strength meter with instant visual feedback as the user types, using dynamic color-coded cues (red/yellow/green) to indicate security level.
- Designed a clean, Apple-inspired UI with smooth CSS transitions and a fully responsive layout across desktop and mobile.
- Deployed live via GitHub Pages: [password-strength-indicator](#)

CivicCopilot – Public Issue Tracking Platform | *FastAPI, PostgreSQL, JWT, Gemini API, React.js*

- Led backend development, designing REST APIs for complaint management, authentication, role-based access control, and multi-department routing.
- Integrated Gemini API to automate complaint classification and intelligent routing to relevant government departments.
- Improved PostgreSQL query performance through indexing and query optimization, reducing average API response time by 26% under concurrent load.

Education

Punyashlok Ahilyadevi Holkar University, Solapur

Bachelor of Technology in Computer Engineering

2024 – 2027

CGPA: 8.3/10.0

SVERI's College of Engineering, Pandharpur

Diploma in Information Technology

2020 – 2024
